

香港聖公會明華神學院校友會  
HONG KONG S.K.H.  
MING HUA THEOLOGICAL COLLEGE ALUMNI ASSOCIATION

### History

The Association was incorporated in 2000, though it was founded in 1998. Initially, it only comprised of members who had enrolled for the College's 3-year part-time programme of theological studies. Since then, some of them have undertaken full-time theological studies and have become priests. Others continue to serve as lay leaders in their own churches. It was this special bonding that drew the members together and formed the Alumni Association.

### Vision

The Association aims to encourage members for continual fellowship and academic exchange. Through educational, spiritual and social activities of the Association, alumni are able to increase their knowledge, to renew their faith, to keep in touch with one another and to adhere to the Anglican tradition and the Anglican Communion.

### Activities/Events

The Association has, on average, three activities/events a year including the Annual General Meeting. Activities are so organized that a balance between the academic, spiritual and social objectives is maintained.

### Membership

Ordinary Members (OM) – those who have undertaken and completed a minimum of five subjects/courses offered by the College.

Associate Members (AM) – those who have undertaken and completed a subject/course offered by the College.

### Expanding the membership

The current committee has a plan to expand the membership of the Association. A survey has been conducted on the existing members and potential members in order to search various activities for the next year or so.

### Special Offers

Alumni receive special offers on various medical services, and also on different purchases. Members will be informed of the updates.

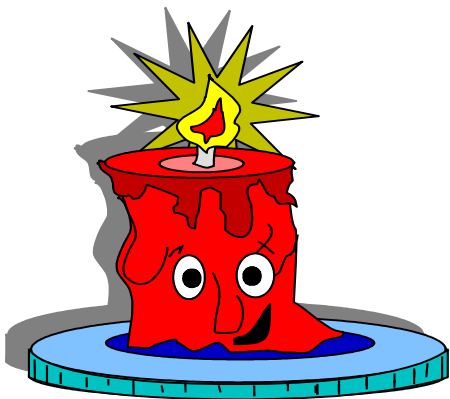

## How to get involved?

We encourage you to apply for a membership as Ordinary or Associate Members. [An application form is attached]. We encourage you to be actively involved. We invite you to the AGM every year. We ask that you will give us your valuable suggestions and feedback on the activities.
